## LOCAL MINING REVIEW.

For the week ending Nov. 16, 1912.

Our review of the mines in this district for the past week is not as full as we design making it in the future. Owing to the many improvements being made in the way of hoisting works and housing for shafts, the underground work in many important mines has not been pushed with the usual vigor. These improvements, however, are essential to the working of the mines, and their importance in the development of mining interests in this district will be made manifest in the near future. The many new buildings going up for business purposes and for private residences strongly evince the general confidence in the permanence and value of the mines in this district.

## Shipments of bullion for the past week, \$110,944.38.

SILVER PEAK mine is being worked under the Superintendency of Mr. Cline. The main shaft is down 120 feet. On the 90-foot level drifts running both east and west have proven the ledge to be well defined and from three to nine feet wide, with an average of four feet of good pay ore. They are now taking out from 12 to 15 tons of ore per day, which will mill at least \$100. We were shown through the mine by Mr. Miller, the Foreman, and must say that we were much surprised to find a ledge so well defined so far away from the Raymond & Ely, as Commissioner Raymond had reported that outside of the Raymond & Ely and Meadow Valley there were no well defined mines in the camp. Much credit is due the Superintendent for the energy and perseverance displayed in opening up this mine, for it certainly proves conclusively that there is a well defined ledge running through from the Picoch to this point and beyond. In our opinion the Silver Peak will be a second Raymond & Ely as soon as the mine is properly developed, and from what we could learn from Superintendent Cline he intends pushing the work forward as fast as possible and thinks of having hoisting works erected at an early day, which will enable him to take out from 50 to 60 tons of ore daily.

PORTLAND EAST EXTENSION.—In previous issues of our mining review, we have given notice of this rich discovery. One of our prominent citizens left for San Francisco a short time ago and the probability is that before the 1st of December the mine will be in the hands of a first-class corporation. The Portland East is situated 580 feet from the Portland shaft, and runs from the line 1,500 feet due east. The shaft has reached 60 feet in depth, and the vein is fully defined. During the past week prominent experts have examined the ledge and pronounced it to be of a first class character. Assays were taken which run from \$125 to \$150 to the ton; work is being pushed rapidly ahead and from the present appearance of the vein it is most probable that within the coming 30 days an immense body of ore will be struck. It gives us great satisfaction to chronicle the success of this mine. The owners are men who came here at an early day; have toiled hard, and at last they have been rewarded. Let all show the same perseverance, and success will reward their efforts.

CHAPMAN.—Hoisting works will be erected on this mine as soon as the machinery can be brought from San Francisco. Arrangements have been made with the American Flag mill to work 500 tons of ore. There is now on the dump about 160 tons. The force of men will be increased in the next week, and the ore extracted from the upper levels. The ledge cut at the 160-foot level is improving. The ore taken from this level is of higher grade than any found in the mine. There is every prospect of the ledge at this depth developing into a good mine. Work is being prosecuted in this portion of the mine with eight-hour shifts.

ASSAYING.—As a concomitant of mining assaying is entitled to mention. T. R. Butler, during the past week, has been steadily at work melting and refining bullion from the Picoch and Condor mills. Thirteen bars from the Picoch were found to average about .900 in fineness, and that from the Condor .800. He is constantly refining for the different mining companies here, and all who desire to ascertain the exact value of their ore should apply to Mr. Butler, as his apparatus is complete and he has had large experience in the business.

IVANHOE.—Drifting east and west on the vein. At a depth of 200 feet, considerable ore is being hoisted and it is found to be first-class character. Two separate veins which seem to be running together give promise of good returns in the near future. Assays of the ore made yesterday showed \$75 to the ton. Grading is now going on preparatory to the reception of the hoisting works, which are expected in a few days.

NEWARK.—About three tons of first-class ore is raised daily from this mine. The wuzze in the west drift, first level, is looking well and improves with depth. The east drift has cut through the porphyry cross-course and is now in quartzite, with favorable indications in the face of the drift. The main shaft has reached a depth of 97 feet below the first level. On Monday a drift will be started south to cut the ledge.

MAMON.—The sinking in this mine has reached a depth of 100 feet, but the rock is very hard, compelling constant blasting. The ledge continues about as it was reported in our previous review. The stopes in the drift are looking well. Three tons of ore from the stope have been placed on the dump in the last two days. The mine throughout presents a most favorable appearance.

SUNBEAM AND EXCELSIOR.—Mr. J. J. Nagle, in addition to the superintendency of the Portland S. M. Co. works, also has charge of all the workings of both the Sunbeam and the Excelsior mines. He is an old-time Superintendent on the Comstock range, and by long experience and close attention to mining, has acquired a knowledge of the business second to no man on the coast.

AMADOR TUNNEL.—No particular change in this mine since we last reported it. Work is progressing as rapidly as possible without machinery, and the prospects are that this will prove one of the richest mines in the district.

FLORAL MILL.—The frame work is completed, and the building is being closed in as rapidly as lumber can be obtained. The battery timbers are about ready to be put in position. The remainder of the machinery was expected yesterday. The entire work is being pushed forward rapidly under the direction of Superintendent Clark, and if nothing unforeseen intervenes, the mill will be ready for operation on the 15th of next month.

KENTUCKY.—This mine is still being worked vigorously with a view to demonstrate that the claim of the Kentucky to the ground in dispute with the Raymond & Ely is based upon law and justice. The Kentucky Company expect to accomplish all the work necessary before the 12th prox., the day set for the trial of the issue in the District Court.

PORTLAND SILVER MINING CO.—Working three shifts. The perpendicular shaft has reached a depth of 110 feet. Workmen are drifting from the main shaft, on the ledge, which is five feet in width, and are taking out ore of superior quality. About 70 tons of good pay ore are now on the dump. J. J. Nagle is the Superintendent.

CHIEF OF THE HILL.—Taking out 4 to 6 tons of ore daily, which is being crushed at the Magnet Mill. The battery assays are higher than any heretofore milled. Wines Nos. 2 and 3 are down about 90 feet. Mine looking well throughout. Will commence shipping bullion in a day or two.

PHENIX.—There is nothing new to report relative to the mine since our last. The magnificent hoisting works are reaching completion, and we can safely say that they will be the most complete hoisting works in the district.

CHIEF OF THE HILL—East Extension.—The work is being pushed forward as rapidly as possible, under the Superintendency of Mr. Hardy, and he feels confident that within a short time he will report rich ore and plenty of it.

BOWEN.—Mr. Blair, the Superintendent of this mine, informs us that he is sinking as fast as possible. In our next review we expect to have something favorable to report in regard to the Bowers.

BALTIMORE.—The contract of one hundred feet was completed on the 9th inst. The ledge looks well, carrying small bunches of good ore. Cross-cutting and drifting each way on the ledge is being pushed ahead.

PICOCH CHAMPION.—Mine working two shifts. It is at present down 140 feet, and looks remarkably well. Following the ledge down, and expect to strike pay ore soon.

MEADOW VALLEY.—No particular change to note in this mine since our former review. Work is progressing as usual.

FROM SALT LAKE.—E. L. Mason, our worthy County Surveyor, arrived a few days since from Salt Lake City, where he has been engaged in surveying the Emma mine. The Emma and Illinois Mining Companies have figured largely in the Courts at the City of the Saints, the bone of contention being the whole of the Emma mine property. The array of counsel in this celebrated case included, for the Emma, Senator Stewart, Tremor W. Park, of Vermont, (formerly of California), Moses Kirkpatrick, formerly Senator from Sierra county, and Chas. H. Hempstead; and on the adverse side, Judge Heydenfeldt, formerly on the Supreme Bench of California, Geo. Cadwallader, of Sacramento, and Carter & Smith, appeared. Mr. Mason prepared a map of the survey made by him, which was used in Court, and has been detailed in these columns. He was subjected to a close cross-examination by the counsel for the Illinois Company. The suit was finally settled by compromise, the Emma paying the expenses of the suit and one million dollars.

SPLENDID TURNOUT.—Yesterday we had the pleasure of a ride down the road in a Kimball buggy, drawn by a handsome pair of bay horses from the Dexter Stables. There is no finer pair of horses in the State. Cincque Barnes, who succeeds Travis Bros. in the livery business, did the honors on the occasion.

JUSTICE'S COURT.—Yesterday F. J. Beaumont was brought before Justice Stoutenburgh to receive the sentence of the law—having been found guilty of selling goods and liquors without license. Mr. Beaumont was fined \$300 and costs—amounting to near \$300 in all. An appeal was taken to the District Court.

PUBLIC SCHOOL.—The public school of Picoch now has 110 pupils in attendance, and are progressing finely with their studies. The building is warm and comfortable, cleanly and properly ventilated. Mr. A. B. O'Dougherty is the principal in charge, and is ably assisted by Mrs. Waltham.

P. L. SHOAF.—We learn from a Salt Lake exchange that P. L. Shoaf, Assemblyman elect, will remain in that city in charge of Gen. Conner's business, until the time arrives for him to proceed to Carson City.

EPISCOPAL CHURCH.—Services this morning and evening. Rev. Henry L. Badger, Rector.

CATHOLIC CHURCH.—Rev. Father Monteverde will officiate this morning and evening.

A pleasant hour may be passed at Clancy's Saloon, where all the papers are kept on file for the use of patrons. n 16

POLL TAXES.

OFFICE OF THE COUNTY ASSESSOR

Lincoln County, Nevada.

NOTICE IS HEREBY GIVEN THAT THE POLL TAX for the year 1912 IS NOW DUE AND PAYABLE TO THE COUNTY ASSESSOR.

By the Act of March 4, 1867, all Corporations or individuals having persons in their employ ARE HELD RESPONSIBLE FOR THEIR POLL TAX.

J. A. CURTIS, Assessor.  
202-deal

THEATRE.—On account of the late cold snap it has not been very encouraging to the Lorraine & Mason Troupe, and the management beg leave to inform the public that they will re-open on Monday night for the season, on which occasion that bright little star, Miss Maggie Knight, will make her first appearance. In conjunction with Lorraine, Mason and all the old favorites. The theatre will be made warm and comfortable in every respect. Two comfortable private boxes will be ready for those who wish to engage them. Gentlemen need not be afraid to bring their ladies, as strict decorum will be observed throughout the performance. Reserved seats can be engaged at the Theatre from 1 to 4 p. m. See programmes of the day.

The Rev. Thomas Fraser, Missionary Agent of the Presbyterian Church, will preach next Sunday, Nov. 17th, in the School House of this place, at 11 o'clock a. m., and at 7 p. m.

COL. HARRY I. THORNTON will leave Picoch to-morrow for a visit to San Francisco.
